Hachikita Highland Beautiful View Spot

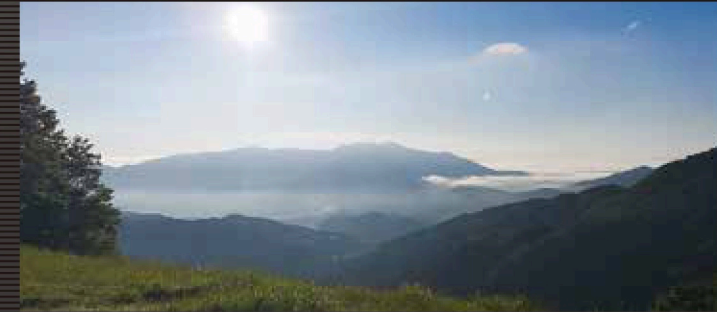

Hachikita Highland is full of nature.
Let's go out with your smart phones!

The photo taken at the point I. There is Onuma around the area. It is near the roadside and the sunrise view is fantastic.

The view from the point M, the top of Mt. Hachibuse. The mountain in north-northeast is the Mt. Tsurukawa, one of the 100 best tourist places in Hyogo. You can see Mt. Daisen in Tottori too when the weather is nice.

The view of the east from the point L. The series of the mountains are spectacular and a sea of clouds in late fall is breathtaking. Surrounding is the deciduous forest and it has different aesthetics in each season.

Visit shops and sightseeing spots with coupons!

If you need a reservation, please ask at your inn.

Below, "valid" means the validity period of the coupons. Open days and days-off on coupons are limited to that period.
